Therisa Phan

Brooklyn, Maryland | Therisap123@gmail.com

Education:

University of Maryland, Baltimore County B.S. in Information Systems, GPA: 3.97
(Expected: May 2026)

Technical Skills:

Java	Microsoft Office	C++	Teamwork
Python	Data Analytics	Trilingual	Data Management
Docker	HTML	Java GUI	Database
SDLC	Wireframing	System Design	UI/UX Principles
Git & Github			

Projects:

UMBC Lost and Found System

- Analyzed user needs and identified key system requirements for a campus lost and found solution
- Created process models and diagrams to visualize workflows and system interactions
- Applied SDLC concepts to plan and design a structured system from start to finish
- Collaborated on organizing system features to improve usability and efficiency

Docker Database Project

- Designed and implemented a relational database using SQL scripts
- Used Docker to create a consistent development environment for database deployment
- Managed project files and version control using GitHub
- Applied database design principles such as normalization and table relationships

Portfolio Website

- Developed a responsive personal portfolio website using HTML, CSS, and Bootstrap
- Designed a clean and user-friendly interface following UI/UX principles
- Organized content to clearly showcase projects, skills, and technical growth
- Ensured mobile-friendly design and consistent layout across different screen sizes

Work Experience:

New Balance (January 2023 - March 2023)

-Retail Sales Associate

- Follow safety regulations, including proper lifting procedures and timely reporting of all accidents and near misses.
- Solve any customer problems/answer any questions.
- Provide customer service using proper selling techniques, product knowledge, and the GUEST service model.

Administrative Support Assistant (April 2024 – Sept 2024)

-Psychiatric Rehabilitation Program

- Supported the CEO with research and file management, including preparing reports and handling confidential information.
- Collected and summarized patient feedback from clinician meetings to assess satisfaction and guide future appointments.
- Analyzed large volumes of subjective feedback to identify trends and areas for improvement in patient care.
- Coordinated with clinical staff to streamline communication and support patient management processes.
- Managed and organized data to ensure accuracy and accessibility for clinical and administrative use.
- Assisted in developing and implementing new procedures to improve efficiency and patient experience.
- Provided support and care coordination for homeless individuals and those with addiction issues, ensuring they received appropriate resources and services.

Community Service:

- Fundraising Volunteer at Buddhist Temple (June 2017- Current)
- Pulsera Project (Fall 2018)
